CHARLES A. HALE,
EDSON L. HURD.

REPORT OF THE BOARD OF EDUCATION

The school work of the town has been efficiently conducted the past year by the same corps of instructors that did the work the year previous, with two exceptions. In No. 4, Bessie N. Woods tendered her resignation at the end of the second term and Miss Grace A. Britton was installed in her place, and Miss Maude Wentworth was secured to do the work in No. 8. The work in all the schools has been uninterrupted by sickness or any other cause and good progress has been made.

We have carried out the expressed wish of the citizens in making the school terms of equal length in all grades and if that is continued and the present number of weeks of school given it will necessitate a larger appropriation.

Thirteen graduated from the High school in May, being the largest class ever graduated since the school was established. The same annual reunion of the Alumni of the school was held in Aug. and fully attended. Sentiments of loyalty to the school town were expressed, which showed that in time something will be done to lift the school to a higher grade in intellectual attainment.

On the 12th of February the schools observed the day set apart to honor the memory of the Martyred Lincoln. Portraits of Lincoln were given by friends to be hung in the school rooms and very instructive and interesting exercises were given by the teachers and scholars.

Probably there is no example in all modern history so inspiring to the young, who are anxious to understand and appreciate the possibilities afforded by our fine institutions, in doing noble work and attaining high positions, carrying with it the gratitude of all subsequent generations.

An effort will be made to get the High school approved for two or three years if possible. We can hardly expect to get the standard of the school raised with our present means, so that the school will be approved for the full four years. There is a tendency to make instruction more practical by introducing courses in industrial and

mechanical science, and text books are being made with that object in view, and if the youthful mind can be strengthened and taught to use all its powers and at the same time learn something in the practical application of affairs a point would be gained. On the following page will be found the usual tabulated statement of school. Respectfully submitted.
